WHERE SERVICE AND QUALITY IS OUR FIRST NATURE

Dip Rod/Dip Stick Liquid Level Gauge Stick (MAKE : ANALYSIS)

Product Description

- Also called : Tank level indicator, tank gauge stick, dip rod for barrel, container level gauge, level gauge for steel tank, tank level gauge, tank level measuring, tank level indicator, tank level measurement tool, dip rod for drum.
- Analysis Instruments dip rods and dipsticks are manufactured from Aluminium, Brass, Stainless Steel SS304 / SS316, Laser/GRP making them durable, flexible and spark proof and hence suitable for use in solvent, petroleum, diesel and other storage tanks and in demanding services.
- Analysis Instruments dip rod and dipsticks are calibrated to suit dimensions of your storage tank, vats and barrels meaning that they provide highly accurate liquid volume measurements and calibrations traceable to NABL standards.
- Analysis Instruments dipsticks marked in Litter, Meter, Centimetre, Millimetre and inches.
- Analysis Instruments dip rods and dipsticks Lengths are available as per customer requirement.
- Analysis Instruments dip rods and dipsticks are calibrated to suit your needs: litres, M3, US gallons or regular height in: millimetres/inches.
- Analysis Instruments dip rods and dipsticks are suitable for all liquids: oil, diesel, petrol, paraffin, kerosene, hydraulic fluid and other oils and other liquids.
- Analysis Instruments dip rods and dipsticks are suitable for rectangular horizontal or vertical cylindrical storage tanks with or without dish ends, and for oil drums or barrels.
- Analysis Instruments Dip Rods are used for Liquid specially Petroleum products Like LDO, HSD, Kerosene, Furnace Oil, Bio Diesel Etc. functions equally in static or mobile conditions in Urban, Suburban & Rural Areas.

Features

- To check the liquid level in the tank / container.
- This dip rod is made of square metal bar and calibrated in mm with engraved and inked graduations.
- It has a metal loop handle for comfortable handling. And the stainless steel body with mirror buff finish ensures easy cleaning of the rod.
- Length can be custom made as per customer requirement in meters.
- Dip rod for tanks to manually check the level of liquid content left inside.
- Dip Rod Liquid Level Measurement Gauge Stick.
- Smooth flat surface with precision of measures, Accurate measurements of liquid.
- Smooth flat surface with precision of measures
- Accurate measurements of liquid

ANALYSIS INSTRUMENTS

WHERE SERVICE AND QUALITY IS OUR FIRST NATURE

Technical Parameter

Parameter	Specification
Product Name	Dip Rod/Dip Stick Liquid Level Gauge Stick
Make	ANALYSIS
Length Of Rod	Min 0.5 meter up to 24mtrs (Longer dip rods available on order)
MOC	Aluminium, Brass, Stainless Steel (SS304/SS316)
Certification	Available
Application	Industrial
Finish	Polished
Aluminium - Item Code	AIDS-AL
Stainless Steel - Item Code	AIDS-SS
Brass - Item Code	AIDS-BR

Guarantees

- Life-long repair.
- Quality problem (except for man-made damage), return and change, all is free
- Our customer service and technical department is available to answer your questions about our product or need help to decide which one is the right one for you.

Maintenance:

No special tools are required to carry out periodic maintenance. Periodically i.e at least once in a Six months should be cleaned for smooth functioning.
